INTERESTS	I build scalable products and enjoy making complex systems easy to understand. I practice agentic engineering end to end, staying hands-on across the full lifecycle: setting product direction and architecture, building systems, orchestrating and reviewing agents, and testing and shipping reliable software.		
SKILLS	Programming Rust, TypeScript, Swift, Objective-C Engineering Agentic development, technical leadership, R&D, scalable systems Languages English, Danish		
WORK	Undisclosed		Remote
	<i>Tech Lead Manager</i>		Jan 2025 – Present
	<i>Senior Software Engineer</i>		Jun 2021 – Jan 2025
	• Lead R&D and engineering for high-performance fintech tools and applications. • Advance agentic development practices across Rust and TypeScript projects.		
	Asynkron		Remote
	<i>Software Engineer</i>		Apr 2021 – Present
	• Develop and design scalable, intelligent desktop, mobile, and web solutions in Rust and TypeScript.		
	TwentyThree		Copenhagen, Denmark
	<i>Senior Software Engineer</i>		Feb 2020 – Aug 2021
	• Led the development of one of their streaming products. • React, React-Native, Tcl, Rust, and TypeScript.		
	Vertical Strategy		Copenhagen, Denmark
	<i>Senior Software Engineer</i>		Jul 2018 – Feb 2020
	• Developed mobile and web projects for large companies, including Maersk, LEGO Innovation Lab, Wintershall, TV 2, Timeshifter, Novozymes, OneMed, Coop, and RealTjek.dk. • React, React-Native, Objective-C, Swift, Java, Kotlin, JavaScript, and TypeScript.		
	Rise Digital		Copenhagen, Denmark
	<i>Senior Software Engineer</i>		Sep 2015 – Jul 2018
	• Developed mobile and web projects for medium to large companies, including LEGO Innovation Lab, TV 2, DMI, Nordea, and Timeshifter. • Rise Digital was acquired by Vertical Strategy. • React, React-Native, Objective-C, Swift, Java, Kotlin, JavaScript, and TypeScript.		
	SHAPE		Copenhagen, Denmark
	<i>Engineering Manager</i>		Sep 2014 – Sep 2015
	<i>Software Engineer</i>		Sep 2012 – Sep 2014
	• Led an internal development team and delivered mobile projects for medium to large companies. • Objective-C, Swift, and JavaScript.		
	LET Software		Odense, Denmark
	<i>Student Software Engineer</i>		Jan 2011 – Sep 2012
	• Developed mobile projects for small companies and individuals. • Lectured students in basic programming. • Objective-C and Java.
